2019 Sheriff Candidate Survey

Name:	Position Sought:
Address:	County/City:
City/State/ZIP:	Party:
	Phone: _____
Email: _____	Web Site _____

1. Recent decisions of the United States Supreme Court acknowledge what credible scholars and sensible Americans have understood for generations: the **Right to Keep and Bear Arms** is a fundamental, individual right of the people. It belongs to all law-abiding citizens and is not some “collectivist” right only to be exercised by politically-powerful ruling elites.

Do you agree, that the right to keep and bear arms is an individual right and should be treated as a fundamental right deserving respect and protection from hostile government restrictions and infringements?

Yes _____ No _____

2. During the 2013 Legislative Session, legislation (HB 2340) was introduced to prevent any agency, political subdivision, or employee of Virginia from assisting the Federal government of the United States in any investigation, prosecution, detention, arrest, search, or seizure, under the authority of any federal statute enacted, or Executive Order or regulation issued, after December 31, 2012, that infringes on the individual Right to Keep and Bear Arms by imposing new restrictions on private ownership, private transfer of firearms, firearm magazines, ammunition, or components thereof.

Will you SUPPORT this type of legislation?

Yes _____ No _____

3. Gun control advocates have recently started pushing “universal background checks” in an effort to criminalize all non-dealer (non-FFL) private gun transfers. The only way to enforce private seller background checks is to also implement gun registration so the government knows who has what guns and when any transfers take place and the only way to enforce universal gun registration is to implement universal compliance inspections.

Will you publicly speak AGAINST “universal background check” and gun registration legislation?

Yes _____ No _____

4. Gun control advocates have attempted to ban various classes of firearms and related items such as:

- semi-automatic copies of popular military rifles and carbines (strictly due to their cosmetic appearance when they are, in fact, identical in function to standard semi-automatic hunting rifles)
- inexpensive and affordable handguns (frequently demonized with the racist and fear inducing "Saturday Night Special" label)
- high-capacity magazines (standard capacity magazines misrepresented as “high-capacity, based solely upon an arbitrary definition of what is “high-capacity”)
- expensive, top shelf guns (like .50 caliber rifles)
- etc.

Will you publicly OPPOSE legislation in the Virginia General Assembly to enact gun bans against otherwise qualified, law-abiding citizens?

Yes _____ No _____

5. Most firearms experts recognize that mechanical devices, such as trigger locks on loaded guns, create an extremely dangerous condition, whereby a gun can be fired accidentally. In addition, these dangerous "lock up your safety" devices may render a firearm ineffective when most needed and leave an individual or family defenseless and vulnerable to attack.

Will you publicly OPPOSE legislation in Virginia General Assembly to mandate use of trigger locks or other such potentially hazardous "safety" devices which have the effect of making it difficult, if not impossible, to have a gun available to defend your home and family?

Yes _____ No _____

6. During the 2007 Legislative Session, HB 2413 was enacted into law to make it easier for all otherwise qualified retired law enforcement officers to qualify to carry concealed firearms without a permit.

Will you make your office available (with the expenses born by the individual retired officer) to provide the shooting qualifications/range time necessary to increase the number of retired officers qualified to carry a firearm concealed?

Yes _____ No _____

7. A few states, such as California, have implemented Red Flag laws, also called Gun Violence Restraining Orders (GRVO) and Extreme Risk Protection Orders (ERPO). The fact that the accused is left free and unsupervised instead of the Court mandating psychiatric observation, detention, or supervision proves that these are really gun-confiscation laws disguised as “gun-violence prevention” or “suicide prevention” laws and are being pushed hard at both the state and federal levels.

Red Flag laws allow a judge to direct the police to confiscate a person's firearms merely on the word of another that the gun owner is a danger to himself or others. The accused does not get any due process, or even any notice, before the police show up at his door to remove all his firearms at gunpoint. Only after a period of time can the gun owner petition the court to return his firearms. The court can deny the petition for as long as they choose.

Red Flag laws strip a citizen of not only his right to keep and bear arms, but also his right to due process and presume guilt in advance of a crime being committed.

Will you publicly OPPOSE legislation in the Virginia General Assembly to pass Gun Violence Restraining Orders into law?

Yes _____ No _____

8. During recent Legislative Sessions, legislation was enacted to make it easier for persons who possess Virginia concealed handgun permits (CHPs) to carry their guns on school grounds while dropping off/picking up their children.

Will you SUPPORT legislation to further allow and protect Virginia's CHP holders to possess/carry their concealed handguns on school grounds?

Yes _____ No _____

9. Recently, there has been an effort to ban suppressors based upon one illegal use of this firearm accessory, even though there are well over one million legally owned suppressors in the United States that are used safely and responsibly by law-abiding citizens.

Unfortunately, too many people believe Hollywood movies that, for dramatic effect, vastly overstate the noise reduction capability of a suppressor. When a gun is fired, three sounds are produced – the supersonic crack of the bullet, the muzzle blast of gasses created by burning gunpowder, and the cycling of the weapon. A suppressor reduces only one of these sounds – the muzzle blast. Even with a suppressor, most common rifles and pistols are still very loud. Suppressors lower the sound level for most firearms from much louder than a jet plane taking off down to the level of a jackhammer.

A suppressor helps prevent long-term damage to the hearing of a shooter, hunter, or nearby people. It also reduces environmental noise levels affecting nearby residences & businesses.

Will you publicly OPPOSE any legislation to ban the sale or possession of suppressors in the Commonwealth?

Yes _____ No _____
